

I know the FCC has no concept of democracy since it is an unelected and up until recently unaccountable governmental body.

The actions of the Sinclair Broadcasting Group in demanding that its underlings play an anti-Kerry piece are highly shameful not because they don't talk about the candidate's record but because they do not add anything to the discussion. They commit a primary logical error of debate in that they only seek to poison the well.

Please put a halt to this shameful behavior by stopping the Sinclair's executive decision or you will only discredit the US government further. The people of America who have long been misled by their media are beginning to wake up to the reality that the fourth branch of the government, the media, does not serve their interests but those of private power. They will demand change as they have just done recently.

Signed,
John Cain
